Supported File Formats in Hit Highlighting

Latest review: 5/19/2014

When you make a search in M-Files, the search words that you have used are marked in yellow in the search result list as well as in the metadata card. When preview is used, M-Files highlights the search terms in yellow in the file contents.

Supported file formats

Hit Highlighting works with the following file formats:

- Microsoft Word files (docx, docm, dotx, dotm, doc, dot, rtf)

- HTML and web archive files (htm, html, mht, html)

- Microsoft Excel files (xlsx, xlsm, xltx, xltm, xlsb, xlt)

- Microsoft PowerPoint files (pptx, pptm, ppsx, ppsm, potx, potm, ppt, ppps, pot)

- OpenDocument files (odt, ott, ods, odp)

- Visio Drawings (vsd, vdx, vss, vsx, vst, vtx, vdw)

- Email files (eml, emlx, msg)

- PDF's

Applies to

Hit highlighting is supported in M-Files Client 9.0 and later.
